

Data Collection / Employee Time Clocks

TimeTECH provides many data collection options to collect your employee's time and attendance data.

From a web entry solution to an advanced biometric time clock, TimeTECH has the perfect solution for your organization. TimeTECH will work with you every step of the way to be sure that your custom time and attendance solution is right for you.

Data Collection Options:

Badge Readers

Fast, efficient and economical solution that has the ability to use Proximity, Magstripe or Barcode cards to enter in work times and labour changes.

Biometrics

One of the best ways to prevent the "buddy punching" problem. Have the ability to identify yourself with the scan of the finger or hand as you enter your work times.

Web-Entry

Collect data both Intranet and Internet using your web browser. This method is deal for organizations who not only want to collect data but also give employees the ability to have self service via our iBrowse module.
